## SIGNIFICANT ACTIVITIES COMPLETED

Our company participated in the APS Project Acceleration Program, supported by Eskişehir Technical University Innovation Factory and ARINKOM in collaboration with the European Union and the Republic of Turkey Ministry of Industry and Technology, and was selected among the top 5 startups, taking part in the overseas market support program.

Google's AI First acceleration program was held in the MENA and Turkey region for the first time, and our company earned 1st place within the scope of this program.

We won ₺300,000 worth of digital marketing support from Webtures.

Our company was included among the global top 10 in the field of Artificial Intelligence in Dentistry in 2024.

A pilot implementation of our project was successfully conducted at Eskişehir Oral and Dental Health Hospital under the Ministry of Health. Work continues for the nationwide expansion of the application.

A tripartite cooperation agreement was signed between our company and Tashkent State Dental Institute in Uzbekistan, Eskişehir Osmangazi University, and Eskişehir University Faculty of Dentistry in the field of artificial intelligence in dentistry.

Work has started to establish a wholly-owned subsidiary company in the United States.

Our co-founder Ahmet Faruk Aslan transferred all his shares to Ahmet Avcioglu, and Şevki Bayrakdar transferred half of his shares to Kaan Orhan.

The investment process with Thakamed has been completed, a \$300,000 USD payment was made, and 20% of the shares were transferred. The legal procedures for the official transfer of the remaining 6% of the shares our company will receive are ongoing.
